Grab'n'GO™

It's a new **digital home**

and you're invited!

With or without hard disk, wired or wireless, Conceptronic has the **right solution** for you!

# The **Grab'n'GO** collection: digital irresistible

## **Storage** solutions

Tailor made products to use for back up, storage on the go or to use as an expansion next to your notebook or PC. Most storage products are also available with built in 2,5" or 3,5 " hard disk.

## **Network Storage** solutions

Share and centralize videos, music, photos and other data in a network or through the Internet. Wired or wireless, in this section you will find stylish designed products to make sure you can have access to your personal entertainment library whenever and wherever.

## **Storage Player** solutions

Watch all your favourite movies and photos, listen to your music files, directly from the built-in hard disk or stream it (wireless) over your network. Media Recorder/Players even add the function to record your favorite TV programs and movies on the built-in hard disk in a universal format which you can playback on any other media player device.

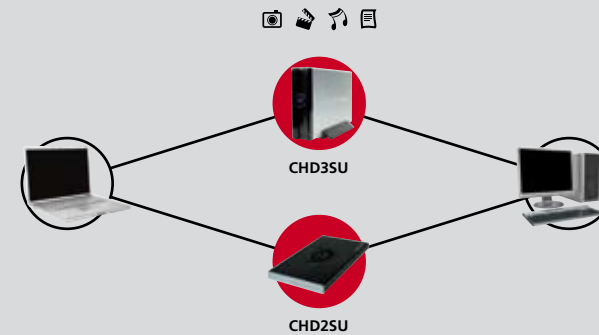

## Storage solutions

Conceptronic offers a complete storage range within the Grab'n'GO collection, to be sure you have plenty of space to store and back up all your data. Having a back up is essential, especially when a virus enters your PC at the least expected moment. Back up important information or just use it to store your holiday photos, thousands of songs or your collection of the best comedies ever. With the sleek designed hard disk box of Conceptronic, you will always have the space to store it. You can choose not only the size, but also the preferred connection to connect to your PC or notebook.

### 5,25"StorageBox

With the external USB 2.0 5,25" storage box (CIS525U) it is easy to add a CD-ROM RW/ DVD-ROM(/RW)/Blu-ray™/HD DVD drive or hard disk without opening your computer. The solid aluminium casing supports USB 2.0 and ensures high speed data transfer. The 5,25" storage box is perfect for transferring data, making backups and using it on several computers.

**Expand a PC or notebook easily with a Blu-Ray™ drive or a DVD burner and backup all your home video's or other important data!**

## 3,5" HarddiskBox

With this harddisk enclosure you can connect an (extra) external hard disk to your PC or notebook. Perfect for transferring data, making backups or using as a second hard disk.

Available in the following versions:

- CHD3UL 3,5 inch Hard disk box with USB 2.0 connection
- CHD3FWU 3,5 inch Hard disk box with USB 2.0/Firewire™ connection

Available in the following versions:

- CHD3SU 3,5 inch SATA Hard disk box with USB 2.0 connection
- CHD3UES 3,5 inch SATA Hard disk box with USB 2.0/eSATA highspeed connection

The **Grab'n'GO** collection: digital irresistible!

CH3B2E

## 3,5" HarddiskBox DualBay

Do you need more capacity than one single drive can offer? Or do you want the security of a mirrored (RAID1) drive? This Dual Bay HDD casing offers both, with a USB and a high-speed eSATA connection.

*Security and performance at the same time.*

## 2,5"HarddiskBox

With this mobile hard disk enclosure, it is easy to add an (extra) external hard disk to your PC or notebook. The hard disk box is perfect for transferring data, making backups or you can use it as second hard disk.

Available in the following versions:

- CHD2UL 2,5 inch Hard disk box with USB 2.0 connection
- CHD2FWU 2,5 inch Hard disk box with USB 2.0/Firewire™ connection
- CHD2SU 2,5 inch SATA Hard disk box with USB 2.0 connection
- CHD2UES 2,5 inch SATA Hard disk box with USB 2.0/eSATA highspeed connection

**Make a backup of all your multi media files and other important data you don't want to loose.**

## PhotoBoxLCD

Don't buy additional memory cards anymore. This compact Photobox with colour LCD screen allows you to copy and store pictures, video and data from a memory card (from your digital camera, PDA or telephone) without using a computer and therefore it is a perfect travel solution. It supports the most popular memory cards. The LCD shows the copy process, available capacity on the photobox and the used space on your memory card. The Photobox is also ready to use as extra hard disk to your computer for storage and backups.

CSPBOXLCD

**Backup all your photos stored on your memory card onsite, so you can re-use your current memory card again for more pictures.**

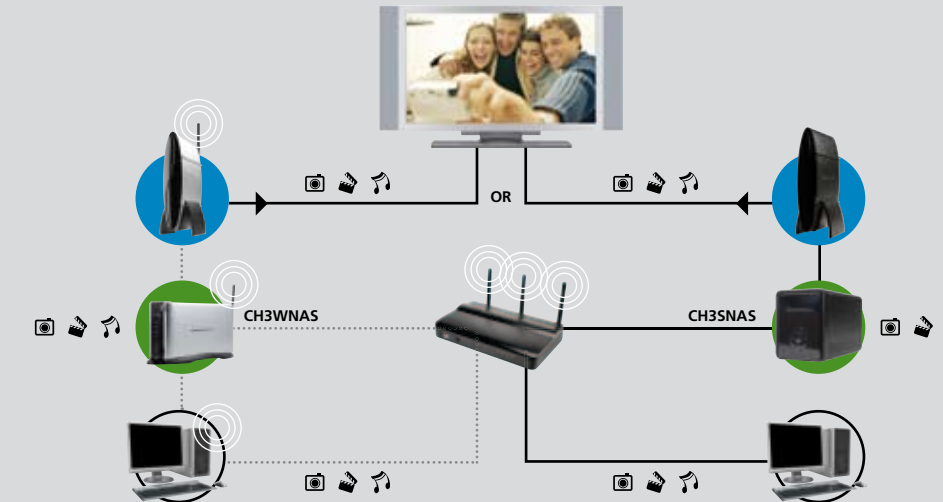

## Network Storage solutions

Back up, share and centralize videos, music, photos and other data in your network, is the main purpose of the Grab'n'GO network storage products. When you don't like to connect and disconnect products to and from your PC or TV, you will love these products! Having access to your photos, music, videos and data in each room of your house or even from your work through the Internet has never been easier. Just centralize all your data and work wireless in the garden, let your kids watch cartoons in the living room or listen to your own selected music while making dinner for friends. It's just that easy.

Direct **wireless** connection

Direct connection

CHD3NET

## NetworkHarddisk

Share and centralize videos, music, photos and other data in your network or through the Internet with this network hard disk. Thanks to the included FTP functionality you can access, download and upload data from/to this CHD3NET. Besides a sharing device, it is a perfect backup solution from and for any computer in the network. The SATA hard disk also provides a USB port for easy connection to any other computer. This makes you more flexible for e.g. taking your company data with you and accessing it at your computer at home and vice versa. Additionally you can create private password-protected folders on it.

Create personalized access to certain content, so your children cannot access data which is not for their eyes.

## MediaStore

The Grab'n'GO Media Store is a powerful double bay HDD SATA solution for sharing & storing media content like music, photos and videos at home or at the office.

The built-in UPnP AV media server offers easy access to all your files through compatible media players (like the gigabit full HD media player) and allows you to stream media without using a PC. Besides your media backup, it's a full function NAS server with 500MHz CPU and built-in FTP server for file access via Internet and access-right management features to give users different read and/or write permission in the (Gigabit) network. To guarantee optimal functionality, the CH3SNAS can be configured as Standard, JBOD, RAID 0 and RAID 1, so it's up to you to set your priority to safety, flexibility or speed.

*High speed large capacity storage at a central location in your house or office.*

## WirelessMediaStore

The Grab'n'GO Wireless Media Store is the ultimate solution in sharing & storing media content wireless like music, photos and videos at home or at the office.

The built-in UPnP AV media server offers easy access to all your files through compatible media players (like the Grab'n'GO wireless media player) and allows you to stream media without using a PC. Besides your media backup, it's a full function wireless NAS server with a powerful CPU and built-in FTP server for file access via Internet and access-right management features to give users different read and/or write permission in the (Gigabit) network. The built-in 802.11g Access Point allows you to create a wireless network within the existing network, so you can offer good wireless coverage in your house or office and have 24/7 access to all your data.

*No need anymore to have a PC 24 hours running to watch multi media files on a TV. The (wireless) media store is your new central storage point.*

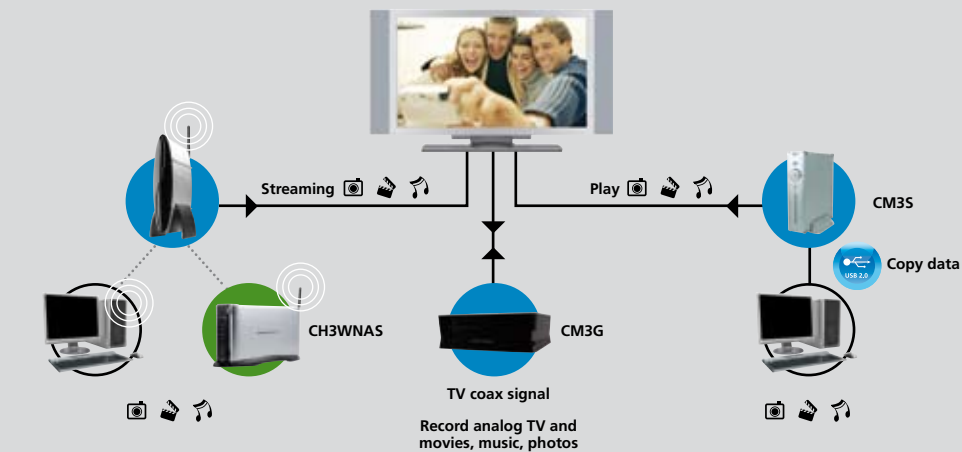

store, play... GO!

## Storage player solutions

Within the storage player range you can choose the product you need which fits to your idea of home entertainment. Conceptronic offers a whole range of media players which allow you to playback all stored movies, photos and music directly on a TV! When you are not able to watch your favorite TV show, use the scheduled recording function on one of the Conceptronic Media Recorder/players and you can watch it whenever you feel like watching it! Being equipped with a (wireless) network connection, some of the solutions even allow you to stream your digital media to and from your computer, other compatible network storage (NAS) products and/or media players. Experience the full digital home experience with the remote in your hand, lying comfortable on your couch!

Direct **wireless** connection

Direct connection

Available from Q1 2009

CM2H

## 2,5" MultiMediaPlayer Pocket

This media player is your personal portable storage box carrying all your favourite music files, photos and movies. Take the player out of your bag or suitcase and connect it directly to the TV of your hotel. Use the built in card reader to show the photos you made during your travel on the TV to your other colleagues or friends. Simply connect it to your notebook to copy some music, photos or videos and the show can begin!

Take all your favorite movies with you during your business trip and plug it in a hotel TV to watch them. Relax while traveling!

CM3S/CM3H

## 3,5" MultiMediaPlayer

This media player is your personal storage box carrying all your favourite music files, photos and movies. Thanks to the big storage capacity and easy set up, you can connect it directly to your TV and select anything you would like to watch or hear. After copying the data from your PC just simply connect the media player to any TV in your home, hotel or at your neighbours and you can enjoy your own entertainment. The player works standalone (without computer).

The CM3H is even equipped with a HDMI connection for 720p/1080i upscaling.

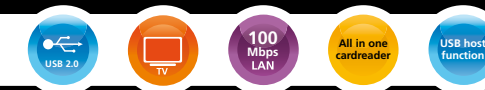

Watch movies, share your holiday photos among friends and family while listening to your personal selected songs.

CSM3NET

## 3,5" MultiMediaPlayer Network

This media player is your personal storage box carrying all your favourite music files, photos and movies. Thanks to the big storage capacity and easy set up, you can connect it directly to your TV and select anything you would like to watch or hear. The Multi Media Player offers also a built in card reader and USB 2.0 host port to watch directly the photos or videos from the flash card or to connect an additional hard disk or USB drive. After copying the data from your PC just simply connect the media player to any TV in your home, hotel or at your neighbours and you can enjoy your own entertainment. The network connection allows you to easily copy files from your computer to the device over the network. The player works standalone (without computer).

Copy your digital content over your network and enjoy it in your livingroom.

The Grab'n'GO collection: digital irresistible!

CM3PVRD

## 3,5" MultiMedia Recorder&Player

**This personal video recorder records all your favourite movies and TV shows on the built-in hard drive via the integrated hybrid TV tuner.** Thanks to the big storage capacity and easy set up, you can connect it directly to your TV and select anything you would like to record. The timeshift feature even allows you to "pause" live television and keep recording it, e.g. when you need to go to the toilet or you get a phonecall. You can also record directly from your DVD player, set-top box or camcorder. Besides recording, the CM3PVRD works as a media player which plays all your digital movies, photos and music. Just connect it to your computer, copy all your favourite media content and connect it to your TV. The device works standalone (without computer) and supports all popular file formats like XviD, MPEG 1/2/4, JPEG, MP3, WMA, AVI, SVCD, CD, VCD and VOB.

Record all your favourite TV shows, analog or digital (DVB-T)!

Recorder & player!

## Connect the Media Giant to your Network in 3 easy steps

## MediaGiant

The Media Giant is a next step in playing & recording. It combines a full featured network HD media player with a personal video recorder. You can record all your favourite TV shows and movies thanks to the built-in analog TV tuner. You can also record directly from your DVD player, camcorder or set-top-box (for digital cable or satellite) with the composite AV input, component video input or the digital FireWire™ input. The Media Giant is a high definition network media player (up to 720p/1080i) which plays all your digital movies, photos and music from the internal hard drive or over your network. Thanks to a built-in samba server, samba client & UPnP AV Twonky media server you can stream all content (incl. recordings) directly from and to your computer or compatible storage devices like the Grab'n'GO NAS products.

The PRO version has 200 Mbps Powerline technology integrated, which allows you to create a network by just plugging the cable in a power socket in your home.

Available in the following versions:

CM3G	Media Giant	10/100Mbps Network Media Player
CM3GP	Media Giant Plus	10/100Mbps Network Media Player + built-in analog TV tuner
CM3GPP	Media Giant Pro	10/100Mbps Network Media Player + built-in analog TV tuner + integrated 200Mbps Powerline technology
CM3GD*	Media Giant Plus	10/100Mbps Network Media Player + built-in DVB-T TV tuner
CM3GDP*	Media Giant Pro	10/100Mbps Network Media Player + built-in DVB-T TV tuner + integrated 200Mbps Powerline technology

\*Available from end 2008.

All-in-one media giant, recording, playing and sharing all you media files at home.

## MediaTitanwith dualDigitalTuner

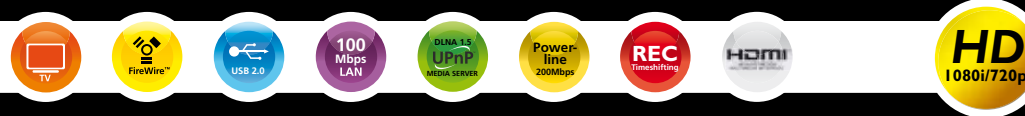

The Media Titan is a (wireless 300 Mbps 11n) HD media player and hard disk recorder with dual DVB-T tuner inside supporting EPG, time shift & pause live tv. The dual HD digital tuner allows you to record a movie or TV program on one channel and watch a different program on another channel at the same time. The Media Titan supports most popular audio & video formats, even movies up to HD 1080p! Thanks to a built-in UPnP AV media client you can stream all content (incl. recordings) directly from your computer or compatible storage devices like the Grab'n'GO NAS products. You will love the simple design, easy to use navigation menu and the unique remote control with scroll wheel and 11 buttons only.

The Media Titan also records free-to-air HD channels in High Definition quality!

The Media Titan keeps your digital life simple. Experience new technologies driven by easy usability.

Available in the following versions:

CMT2D	MediaTitan
CMT2DW	MediaTitan Wireless 300Mbps 11n

CMEDHOST

## MediaAdapter

This Conceptronic media adapter to TV is the ultimate media interface when connecting a USB harddisk, USB memory drive or multiple flash memory card containing movies, photos and music to your TV. Thanks to the built-in multiple connections like composite, S-video and VGA, the CMEDHOST can be used to connect to a TV, PC, notebook, monitor or beamer without any problem.

C54WMP

## WirelessMediaPlayer

The Grab'n'GO Wireless Media player is your personal bridge to share and stream digital media files to your TV. The built-in UPnP AV media client offers easy access to all your files from compatible storage devices (like the Grab'n'GO CH3WNAS and CH3SNAS) or connects to your PC.

The easy to install media player has a very sleek design and is the most flexible way to stream all your personal movies, music, radio channels or photos wired (Ethernet cable) or wireless (802.11g adapter). This allows you to watch your favourite movie wherever you are in the living room, bedroom or garden. You can even connect an USB hard disk or flash drive to watch your digital media locally, thanks to the built-in USB host port. To create the best cinema effect, the C54WMP has component connections integrated for sharp images and a SPDIF connection for overwhelming 5.1 sounds.

CFULLHDMAi

## FullHDMediaPlayerGigabit

Tired of watching all that 'normal' resolution movies and photos on your flat screen? This sleekly designed Full HD Media Player finally allows you to playback all popular formats of movies, photos and music in full HD 1080 resolution such as WMV9, MOV, MPEG, MKV (H.264) and AVI. It has a gigabit network connection for streaming media from your network, but you can also connect a USB storage device to the USB host port (and copy files over your network to the USB device). The integrated BitTorrent client allows you to download directly to an attached USB storage device.

The CFULLHDMAi has HDMI and SPDIF connections to create the best, digital cinema effect.

*The new standard in high definition media streaming.*
